Disposable biodegradable products, certified by TUV Austria, that meet the requirements of the European Standard EN13432

- Shopping bags
- Fruit and vegetable bags
- Pharmacy bag
- Refuse bags
- Plates, bowls and trays
- Transport containers with lids
- Cups for cold and hot drinks
- Cutlerys
- Straws and stirrers

100% compostable

fully organic

eco friendly

biodegradable

BIODEGRADABLE AND COMPOSTABLE SHOPPING BAGS

For the production of our bags we use a plant - based renewable resource - potato or corn starch, and they decompose quickly and completely without releasing toxic materials. In industrial or domestic composting systems, this process is completed most quickly and produces valuable enrichment mixtures for the soil - compost (fertilizer).

We offer customization of bag, produced with the size, thickness and color specified by the client and five color printing. The bags fully meet the requirements of the European Standard EN13432 to reduce the consumption of disposable plastic packaging.

BIODEGRADABLE AND COMPOSTABLE PLA CUPS

Our biodegradable composting cups are certified and made of polylactide (PLA) - an alternative to plastic. Ecologically clean variant made from plant-based renewable resource - corn. We offer cups for cold and hot drinks in different sizes based on your needs.

The material is decomposed in industrial or domestic composting systems to form valuable soil enrichment mixtures - compost (fertilizer)

STORAGE AND TRANSPORTATION OF PLA PRODUCTS

- Avoid high temperatures. The recommended temperature for storage and transportation is up to 45 degrees Celsius.
- Do not expose to direct sunlight
- Store on lower shelves in cooler places in the warehouse
- Do not leave the product loaded for long periods

Ecologically clean **PRODUCT RANGE**

PLATES, BOWLS, TRAYS & HINGED LID CONTAINERS

ADVANTAGES OF **SUGAR CANE PRODUCTS**

- The most environmentally friendly disposable products used so far in the food industry
- More durable and quality products compared to alternatives
- Do not emit aroma or taste in food
- Good heat exchange, suitable for use from - 25° C to + 200° C
- Water and oil impermeable
- Can be used in microwave ovens, electric and gas ovens
